Application No. 09/966,900   Customer No. 01933
Response to Office Action

Amendments to the Specification:

Please amend the paragraph at page 19, lines 4-16 as
follows:

The temporary table 90 includes an image pointer
column 91 which provides a field for an image number (or
storage address) for each of the images stored in the flash
memory 6; a latitude column 92 and a longitude column 94 93
which provide fields for an image picking-up position
(latitude and longitude) for each image; a distance
column 94 which provides a field for a distance of an image
picking-up position from the image picking-up position of a
previous image, calculated from the latitude and longitude
data; and a group column 95 which provides a field for a
result (group number) given by the scope-of-group
identifying operation.

-2-

And please amend the paragraph at page 20, lines 11-18 as follows:

The loaded data, i.e. image number (or storage address), latitude and longitude are placed at respective fields of the image pointer column 91, the latitude column 92 and the longitude column ~~94~~ 93 of the group identification table as shown in FIG. 7. The process goes back to step S1 and repeats this cycle until all of the image numbers and corresponding position data have been loaded.
